TEAMING**

Productive Teaming Retreat

01.03.2023 - From Feb 26th to March 3, about 30 scientists met in the beautiful Czech town of Karlsbad to discuss the future of industrial production. The mix of psychologists, engineers and computer scientists worked on refine and shaping a new paradigm of human-machine collaboration: productive teaming. The core idea of productive teaming is to enhance machine with cognitive capabilites, such that humans can co-work with them in the same way they would do with human partners.
